

Couchsurfing iOS Challenge

Estimated time to completion: < 4 hours

(For your sake, please do not spend more time than this)

Display all the Contributors of the [Alamofire](#) GitHub project, showing avatar profile image and login name in a list or collection. When selecting a contributor, additional information (your choice) about the user should be displayed.

Technical Requirements

- Use Swift version 4 or later.
- Feel free to use any third-party libraries.
- Unit tests (just one or two to demonstrate the concept is fine)

What we're looking for

- Production-quality code
- Best practices
- Clean code and project structure, commented as necessary
- Proper APIs and libraries usage
- Attention to edge cases

Returning the Project to Us

We expect you to use Git for version control. Please return the project to us via email (Zip file), or upload to a github repository if you have that ability.

Feel free to include notes about challenges you faced, as well as extension ideas that you may not have had time to complete.
